

D.J. SPYDERMAN

"DJ Spyderman was immaculate. He was fantastic! He played wonderful dinner music and kept our guests on the dance floor all night long! We would recommend Entertainment Unlimited without hesitation!"

Michelle Kyle

Denny worked with us to make sure to play our special requests. Everyone danced all night & commented on how good the music was. We would definitely hire Denny again!

Dan & Rita Kastner

EQUIPMENT:

C:

"C" is the smaller of my systems but in general as big if not bigger than what most other jocks will bring to a show. Trying to put a label on it as far as people wise, I use the 200 person marker. Obviously there are many variables within each venue as far as acoustics are concerned, therefore as a professional I maintain the +/- 200 person mark for this system to give a QUALITY sound that is not underpowered for the given audience.

- It consists of 2 matching full range speakers on tripods. (They vary from 10" 2-way's up to 15" 3-way's)
- 1 single 18" sub on the floor to follow through the frequency response and bring the thump for the dance floor.
- A dynamic moving intelligent "dmx" light show. Consisting of LED Panels, Strobes and Effects.

B:

"B" is the mid-sized of my systems. As a people marker it is adequate for 250+ people up to around 600 for quality sound. Again there are many venue variables that will influence people size. Anything above 600 people should be consulted with me about. I have played as many as +/- 1000 people with my standard "B" system but again it is venue dependent. At times Extra full ranges and subs may be required.

- It consists of 2 matching 15" full range speakers on poles mounted above the subs.
- 2 matching 18" subs on the floor to follow through the frequency response and bring the thump for the dance floor.
- A dynamic moving intelligent "dmx" light show. Generally a bit more units than the "C" system consisting again of LED Panels, Strobes and Effects.

A:

"A" system is obviously the larger of my systems. It is primarily used for College Formals, University functions, Bar/Bat Mitzvah's and anyone who is looking for an extravagant and impactful light and sound show. People marker wise it is about the same as a "B" system for audio sound.

- It consists of 2 matching 15" full range speakers on poles mounted above the subs.
- 2 matching 18" subs on the floor to follow through the frequency response and bring the thump for the dance floor.
- 1 Full Silver 3-Rod Triangular based aluminum Light Trussing system. It is what is called the "upside-down football goal post."
